

Plug In IoT Solution 4 Freezers & Chillers

# Zuppa Chiller - IOT

ZUPPA Chiller IoT is a APP based Temperature Monitoring solution for all kinds of freezers , chiller , refrigerators that is very user friendly and easy to install in 3 easy steps :

1. Place the sensor in the Cooling/Chilling/ refrigerating Unit
2. Plug the Device to power source
3. Download APP from Play store Log in and start monitoring your system to ensure against loss due to spoilage

# Use Cases

*Door Deep Freezer*

Zuppa IOT

*Display Counter Freezer*

*Single Door cooler*

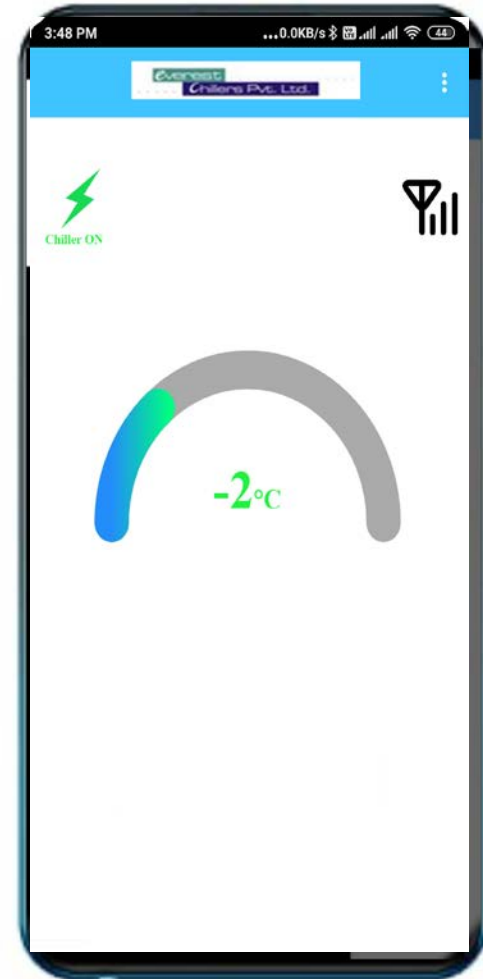

*Freezer On Wheels*

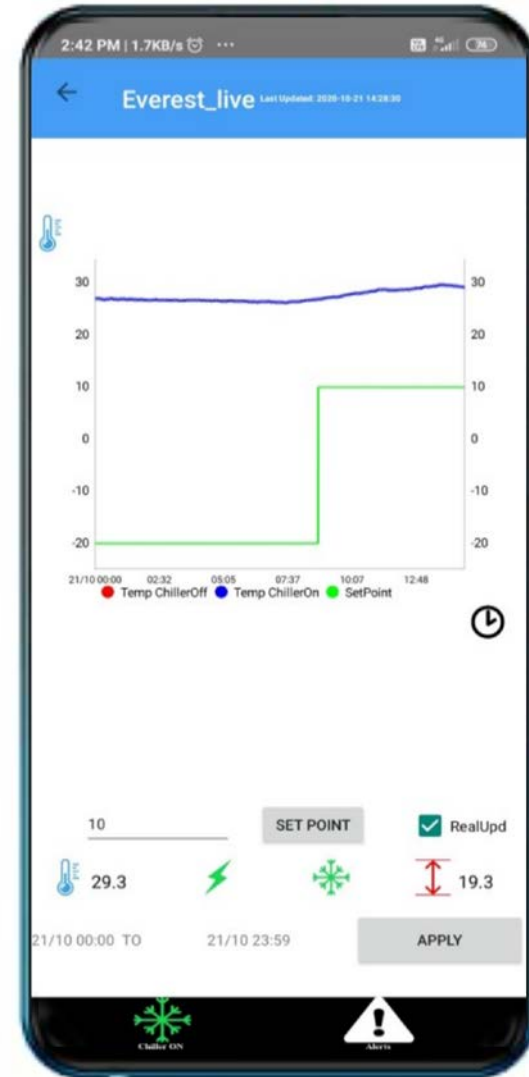

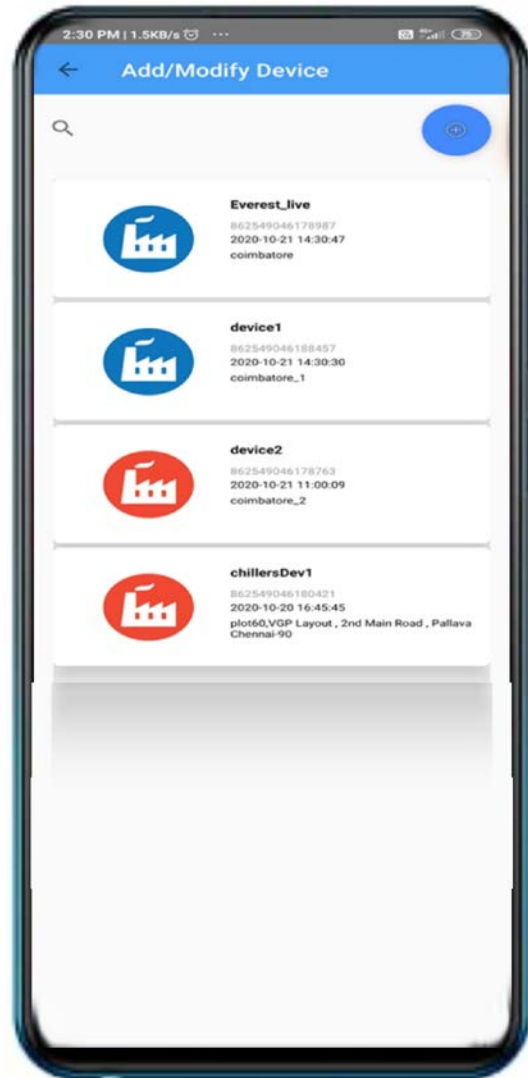

*Cold Room*

# Zuppa IOT – Device, Temperature Probe, Wall Adaptor and Mobile App

# Zuppa Mobile App - Chiller status

# Features of Zuppa IOT

- Zuppa Hardware connects with PLC/Non PLC based Machines
- Mobile App based remote Monitoring & Controlling
- Instant Alert/Notifications from APP
- GSM based remote data transaction
- Value for Money and marginal recurring cost to maintain the system

# Benefits of Zuppa IOT

- Hassle free Monitoring of Machines remotely
- Instant action to prevent loss / damage & Less downtime
- Enhanced efficiency and improved performance
- Time & Cost saving and optimization

## Applications :

- Compressors driven Chiller Units
- Retail Coolers/Deep Freezers/Refrigerator Units
- Cold Storages and Warehouses

# Thank you for your time
